Service job card · An open recall, warranty cover, the customer's concerns and every line of work, each approved by the customer.

Every car with its VIN, branch and yard place, status, age and price, oldest stock first.

What is on every shelf, what is promised to jobs and what is free to sell, with reorder levels.

Opening, debit, credit and closing for every account,
rolled up through its groups, per company and branch.

Every deal, from first enquiry to the keys

Every car and every part, tracked to the shelf

A busy workshop that keeps customers informed

Accounts that keep themselves, with the right controls

AUTOMOTIVE CRM

AutoTech360 CRM

A CRM for new-car showrooms: every lead, test drive, on-road quote, booking and delivery, with WhatsApp built in.

9

stages from first enquiry to delivered car

3

ready-made funnels: retail, corporate & fleet, exchange

3

market price packs: India, GCC and US

4

languages: English, Hindi, Kannada and Arabic

Every lead source, every WhatsApp conversation and every rupee, dirham or dollar on a quote lands on the same customer record.

New-car franchise dealerships

Multi-showroom dealer groups

Corporate and fleet sales desks

Enquiry board · The order bank, live enquiries, SLA alerts and every enquiry by stage, with its car, consultant and next step.

Never let a lead go cold

From test drive to a quote they can sign

Every promised car handed over on time

Conversations and numbers that sell more cars

DIGITAL PRICE STANDS FOR CAR SHOWROOMS

AutoTech360 Price Stand

Tablet price stands for every car on the showroom floor, in English and Arabic or Kurdish, with bulk prices, lead forms and visitor analytics.

1

minute for a price change to reach an online stand

2

languages on every stand: English and Arabic or Kurdish

4

stock badges: available, reserved, sold and coming soon

3

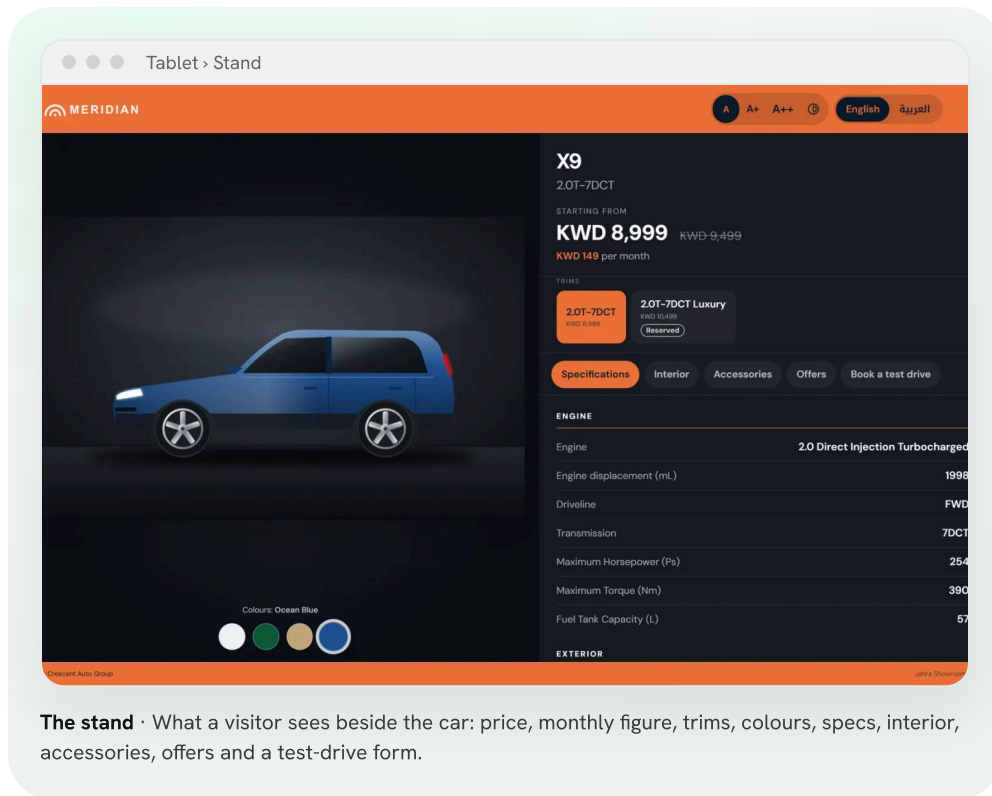

brand roles: manager, editor and viewer, with price approval

Your team manages every stand from one admin: change a price and the stand shows it within a minute, move a whole price list at once, collect tes...

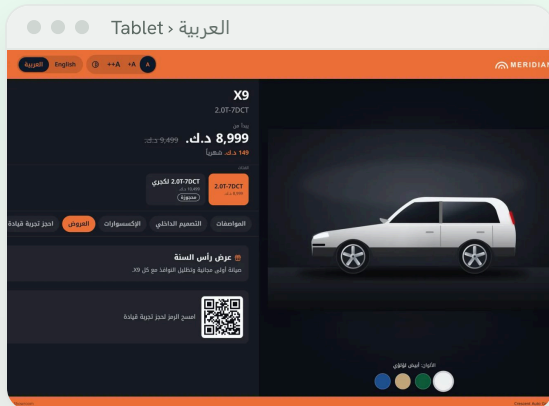

New car showrooms

Dealer groups with several brands

Brand distributors

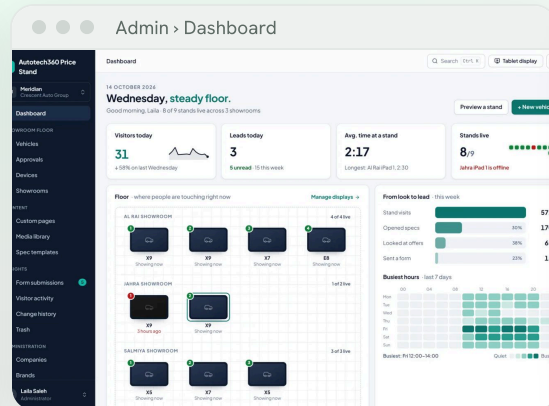

Price Stand, screen by screen

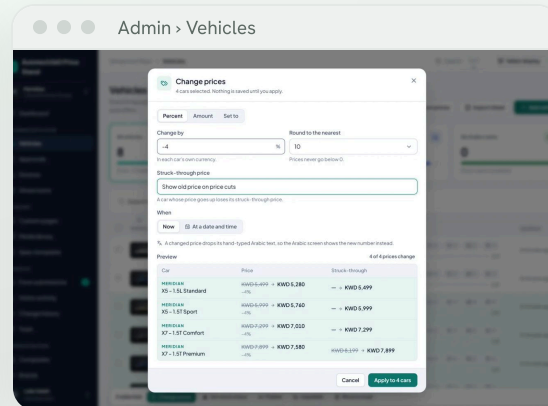

Arabic, right to left

One tap switches the whole stand to Arabic or Kurdish, right to left, and it returns to English for the next visitor.

Showroom floor

Every stand in every showroom, what it shows and whether it is live, with today's visitors and leads.

Bulk price changes

Move many cars at once by a percentage, an amount or to a figure, checked car by car before anything is saved.

ON THE STAND

The whole car, in the visitor's language

PRICES

One price list, the same on every stand

SHOWROOM FLOOR

Tablets that look after themselves

LEADS & INSIGHT

Turn interest at the car into follow-ups

CAR RENTAL AND LEASING SOFTWARE

AutoTech360 Rental

Self-drive and chauffeur rentals, leasing with e-signed contracts, a customer app and a driver app, on one system for every branch.

3

ways to drive: self-drive, with a driver and leasing

10

ready-made reports, from utilisation to vehicle profitability

7

staff roles, each with two-factor sign-in

5

notification channels: email, in-app, push, SMS and WhatsApp

Leasing runs on the same system: plans with a monthly price calculator, applications with a credit check, contracts signed in the app, monthly...

Three apps in your name · Find and book a car · Lease a car · Chauffeur trips

Car rental companies

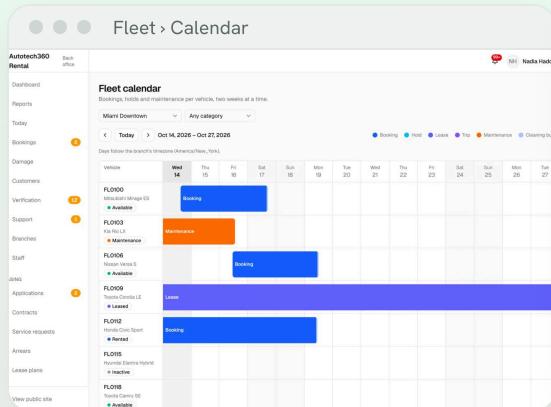

Car leasing companies

Chauffeur and limousine services

The screenshot shows the 'Back office > Dashboard' interface. The dashboard provides a comprehensive overview of daily operations across all branches. It features a sidebar with navigation options like Reports, Today, Bookings, Damage, Customers, Verification, Support, Branches, Staff, LEASING, Applications, Contracts, Service requests, Areas, Lease plans, and View public site. The main content area is divided into several sections: a top summary row with 'Payments today' (0), 'Pickups today' (4), 'Returns today' (5), and 'On the road' (8); a middle row with 'Overdue returns' (0), 'Bookings to approve' (2), 'Extension requests' (1), and 'Cars available' (38); and a bottom row with 'In maintenance or damaged' (6), 'Payment proofs to check' (2), 'Documents to review' (12), and 'Open support tickets' (1). Below these are three detailed tables: 'Pickups in the next 24 hours (4)', 'Returns in the next 24 hours (4)', and 'Documents waiting longest (12)'. Each table lists specific bookings with details like booking ID, customer name, vehicle type, and scheduled time. A 'Service due (7)' section lists vehicles and their upcoming service dates. The interface is clean, modern, and data-driven, designed for efficient branch management.

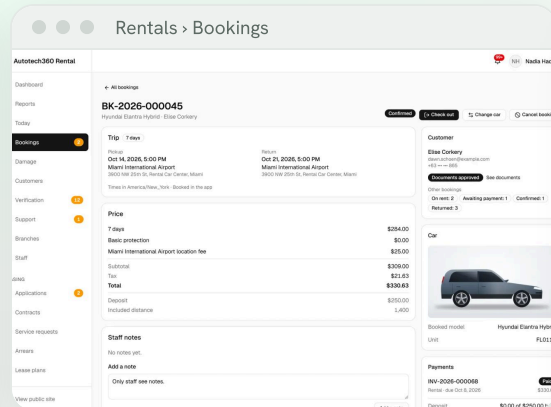

Branch dashboard · Today's pickups and returns, cars on the road and everything waiting for someone, across your branches.

Rental, screen by screen

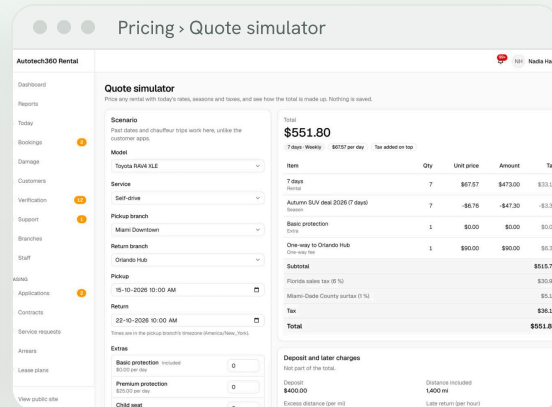

Fleet calendar

Bookings, holds, leases, trips and maintenance for every car, two weeks at a time.

Booking

The trip, price, customer, assigned car and payments of a booking, with check-out one click away.

Quote simulator

Any rental priced with today's rates, seasons, fees and taxes, broken down line by line.

RENTALS

Every rental priced, approved and paid

FLEET & BRANCHES

Cars ready, handed over and checked back in

LEASING

Leasing on the same system

APPS & INSIGHT

Apps for customers and drivers, reports for you

FLEET MANAGEMENT SOFTWARE

AutoTech360 Fleet

Vehicles, drivers, trips, maintenance, fuel, compliance and costs in one system, with an offline driver app and customer tracking.

23

ready-made reports across fleet, drivers, money, operations and compliance

9

roles, from fleet manager and dispatcher to driver, mechanic and customer

4

fuel checks: over-tank, odometer conflict, unusual consumption, duplicate fill

7

automation triggers, from a failed walkaround to an overdue service

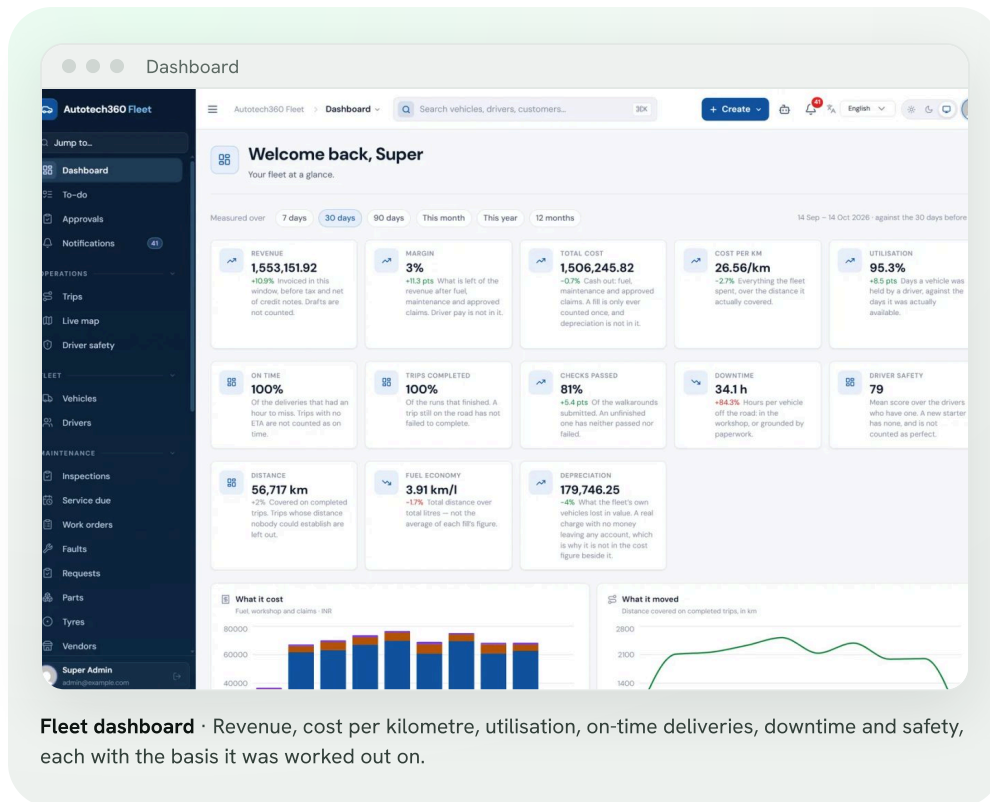

Drivers run their shift from an Android and iOS app that keeps working without signal, from the pre-trip walkaround to proof of delivery.

Three apps in your name · Today's runs · Walkaround · Proof of delivery

Logistics and distribution fleets

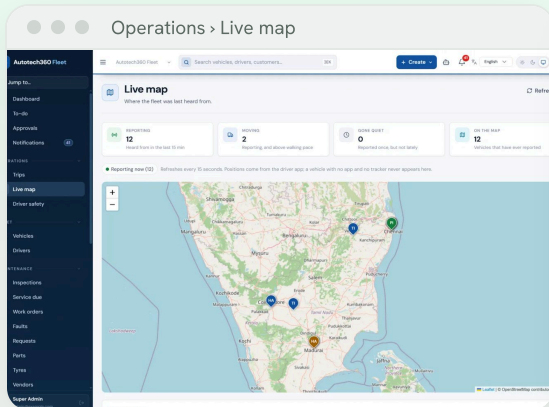

Transport and haulage companies

Corporate and service fleets

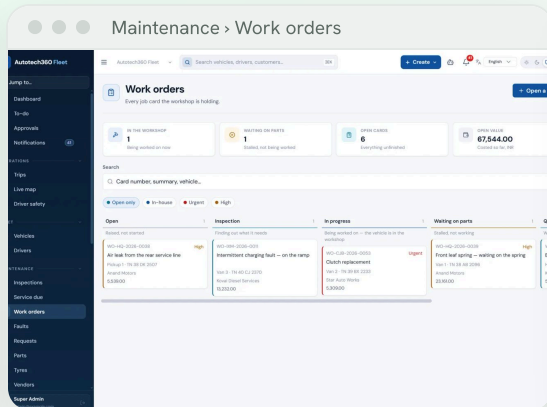

Fleet dashboard · Revenue, cost per kilometre, utilisation, on-time deliveries, downtime and safety, each with the basis it was worked out on.

Fleet, screen by screen

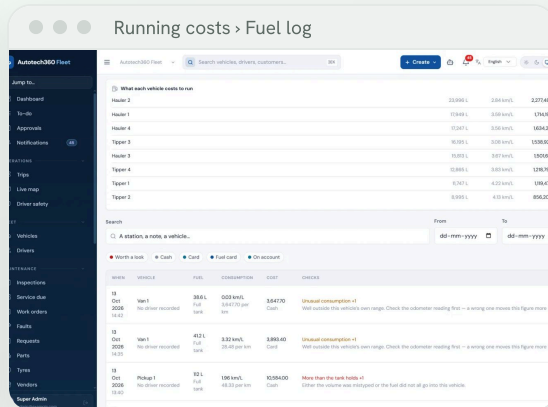

Live map

Where every vehicle was last heard from, refreshed every 15 seconds from the driver app during a run.

Work orders

Job cards on a board from open to quality check, each with its vehicle, garage, priority and cost so far.

Fuel checks

Every fill with tank-to-tank consumption, and the ones that do not add up flagged with the reason.

FLEET & COMPLIANCE

A fleet that is legal and ready to drive

TRIPS & TRACKING

Every run tracked from depot to signature

WORKSHOP

Planned maintenance instead of roadside breakdowns

COSTS & INSIGHT

Know what every vehicle costs and earns

CAR WASH BOOKING SOFTWARE

AutoTech360 Car Wash

A booking website, customer app and admin panel for car wash and detailing centres, with packages, loyalty rewards and WhatsApp built in.

3

parts: booking website, customer app and admin panel

5

booking stages from pending to completed

3

automatic rewards: loyalty, birthday and referral

2

logins: owner and staff, with money kept owner-only

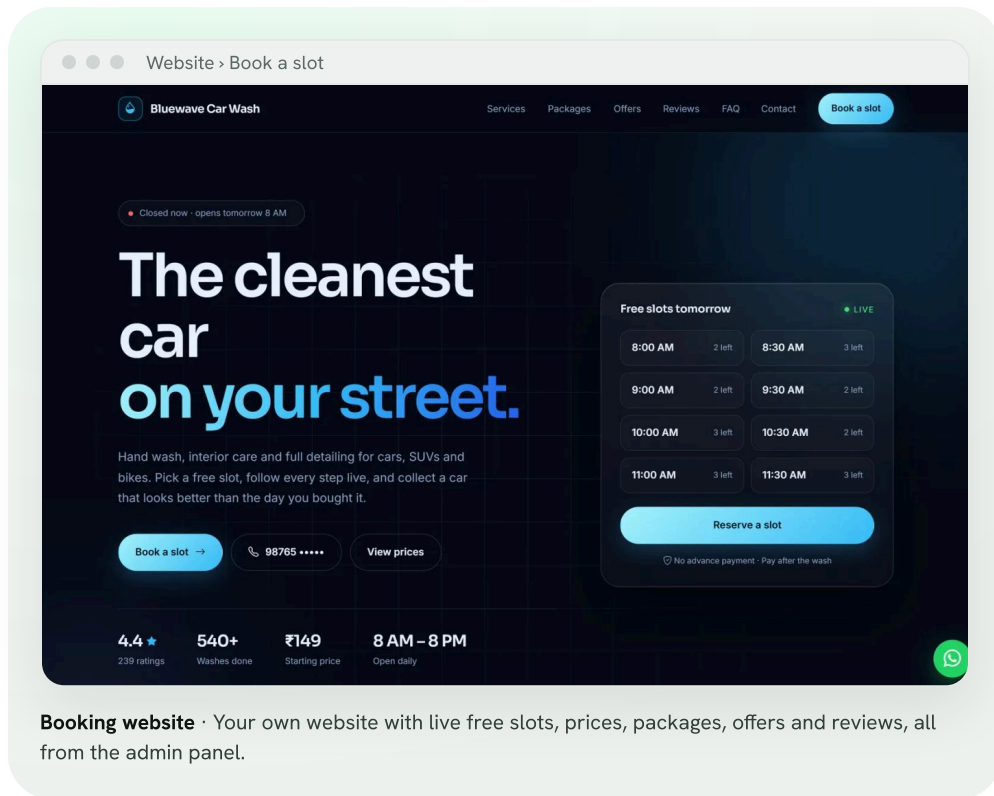

Behind the counter, your team confirms, starts and finishes each wash, takes cash, UPI or card, sells prepaid packages and sends reminders and...

Three apps in your name · Book a wash · Follow the wash · Rewards and offers

Car wash centres

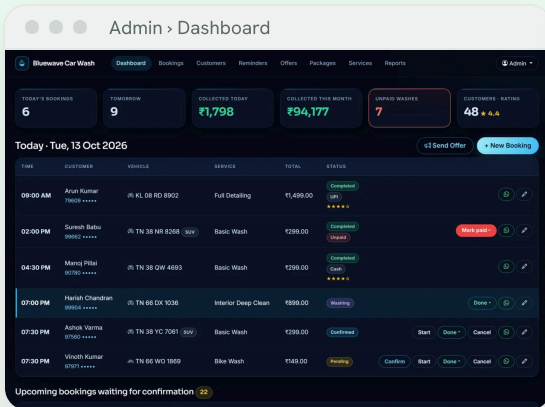

Car detailing studios

Two-wheeler wash points

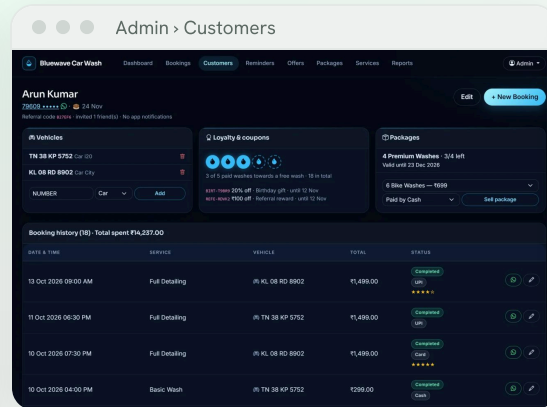

Booking website · Your own website with live free slots, prices, packages, offers and reviews, all from the admin panel.

Car Wash, screen by screen

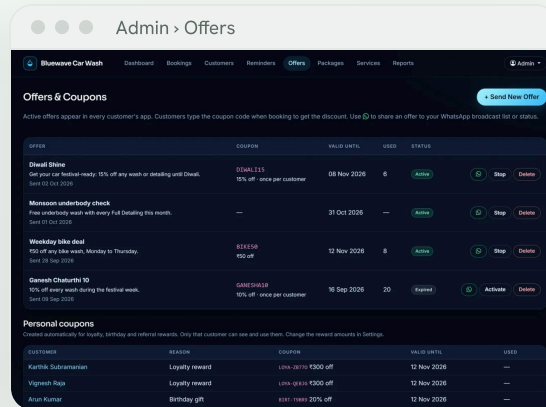

Today's board

Today's washes from completed to washing and waiting, with money collected, unpaid washes and the rating.

Customer and loyalty

Each customer's vehicles, loyalty stamps, personal coupons, packages and every wash they have booked.

Offers and coupons

Offers sent to every customer with their coupon, expiry and usage, plus automatic personal rewards.

ONLINE BOOKING

Customers book a free slot in seconds

GROW

Offers, reminders and numbers that fill quiet days

ROADSIDE ASSISTANCE AND TOWING SOFTWARE

AutoTech360 Roadside

A customer app, booking website, dispatch panel and driver job page for towing and roadside assistance companies, with memberships and reports.

4

parts: customer app, booking website, dispatch panel and driver page

6

services: towing, flat tyre, jump start, fuel, lockout and other

5

job stages from request to completed, each one sent to the customer

3

slow-response alerts, before a customer has to call and ask

Your office sees each request the moment it comes in, on a list and a map, picks a truck, gives an arrival time and sends the job to the driver on...

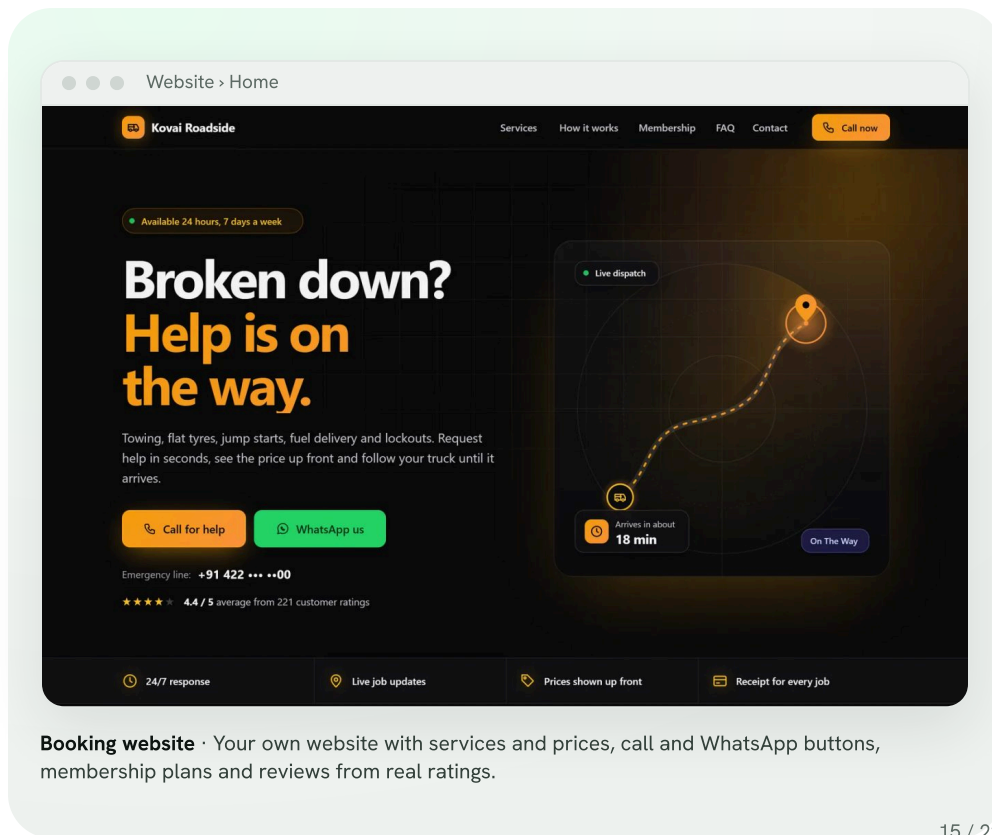

Three apps in your name · Request help · Follow the request · Driver job page

Towing and recovery companies

Roadside assistance providers

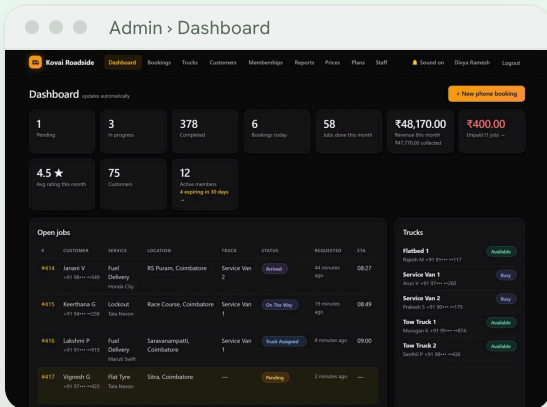

Service centres with a breakdown van

AutoTech360 · Automotive projects

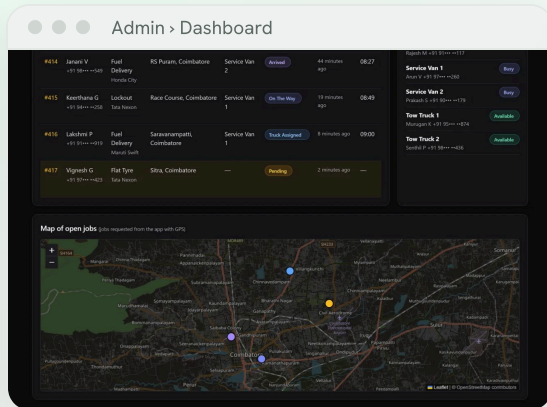

Booking website · Your own website with services and prices, call and WhatsApp buttons, membership plans and reviews from real ratings.

Roadside, screen by screen

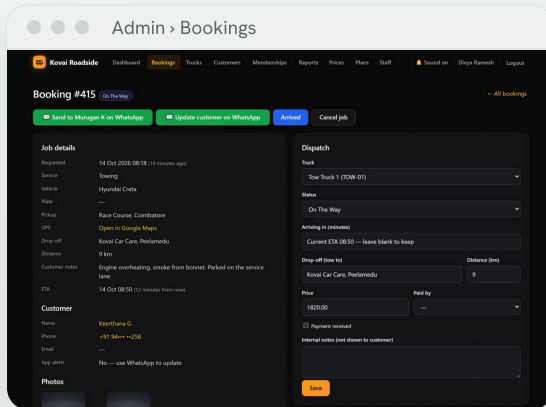

Dispatch dashboard

Every open job with its status and arrival time, every truck busy or free, and the month's money at a glance.

Map of open jobs

Requests made from the app with GPS, on a map beside the list, with every truck shown as busy or free.

Dispatch a job

Truck, arrival time, drop-off, distance and price on one page, with WhatsApp to the driver and the customer.

CUSTOMERS

Help requested in seconds, followed to the end

DISPATCH

The right truck, sent fast

DRIVERS & PAYMENTS

Every job finished, priced and paid

GROW

Members, a team and numbers you can trust

TAXI APP DEVELOPMENT · READY-MADE APP

Taxi Booking App

Passenger app, driver app and admin panel with live tracking and in-app payments, white-label or custom built.

Passenger app

Ride booking, live driver tracking, ride history and driver ratings for passengers.

Driver app

Ride alerts, passenger pick-up and navigation, an earnings dashboard and weekly challenges for drivers.

Admin panel

Watch rides live, manage drivers and passengers, set fares and review payments from a web dashboard.

Real-time tracking

Passengers see live driver location, estimated arrival times and trip progress.

Android & iOS

In-app payments

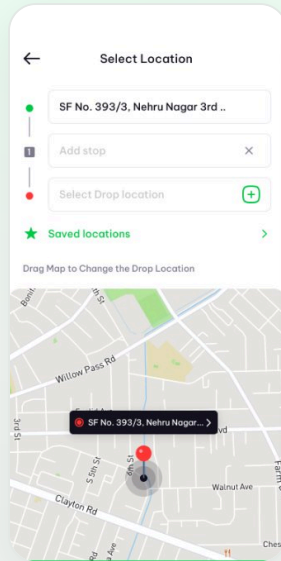

Driver management

Your brand, your way

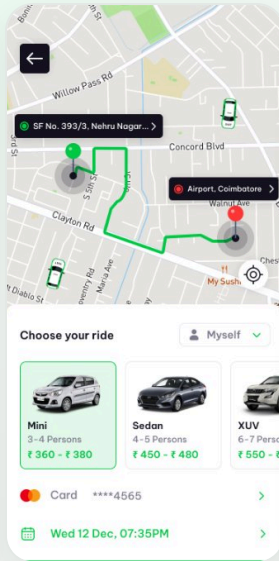

Launch in weeks or build to fit

Transparent rides

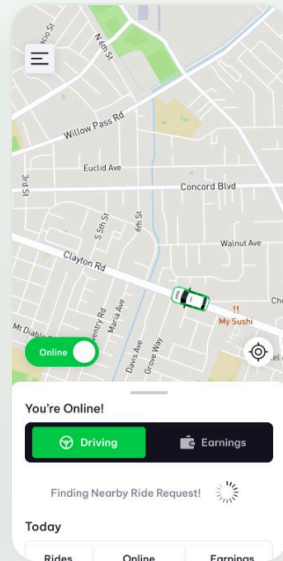

Efficient operations

Select the pick-up and drop

Choose a ride type and fare

Online, waiting for a ride request

CAR SERVICE APP · READY-MADE APP

Car Service App

A customer app for independent workshops and service centres: bookings, live job updates, service history, reminders and payments.

Service booking management

Customers schedule, track and manage service appointments, choosing service centres and convenient times.

Real-time updates

Live service progress updates, including delivery timelines, so customers always know their vehicle's status.

Maintenance history

Detailed service records stored for each vehicle for complete history tracking.

Integrated payments

Secure in-app payments for a smooth, hassle-free checkout.

Android & iOS

Voice note instructions

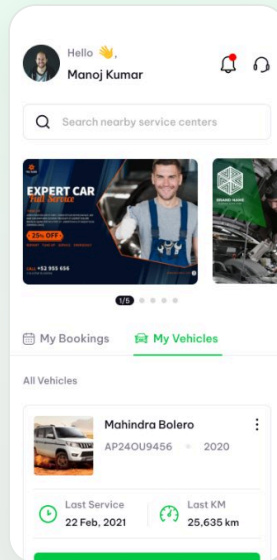

Service customisation

Promotions and discounts

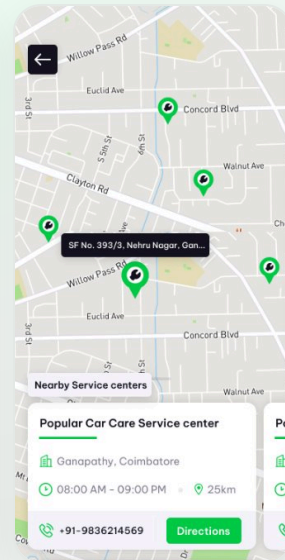

Less downtime

Clearer communication

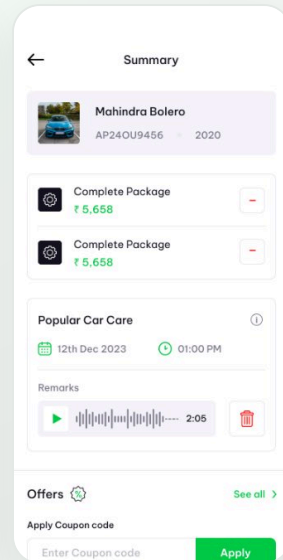

More repeat business

— SPARE PARTS SALES APP · READY-MADE APP

Spare Parts Sales App

Sell and manage spare parts from one app, with catalogue search, live inventory, barcode scanning, payments and delivery tracking.

🕒 Search and filters

Buyers find the right part fast by name, category, brand or specification.

🕒 Real-time inventory management

Track stock levels live and automate reordering so critical parts never run out.

🕒 Barcode scanning

Scan parts in the app for quick, error-free entries and inventory that stays in sync.

🕒 Real-time delivery tracking

Live order status and location updates, with customer notifications at each stage.

Android & iOS

In-app payments

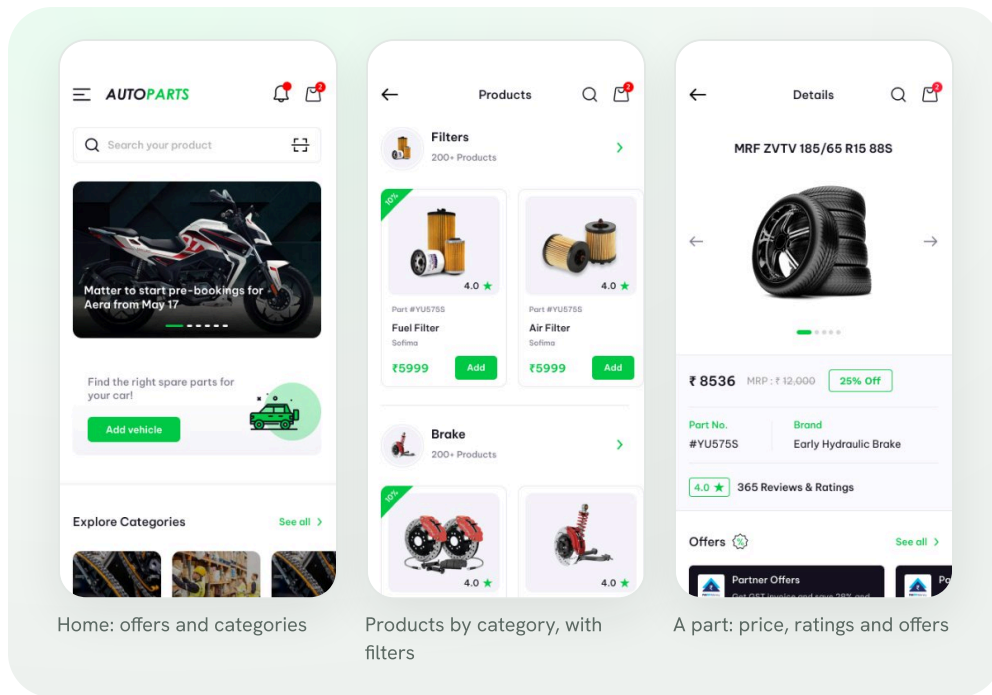

Built-in customer support

Android and iOS apps

Fewer stock-outs

Accurate orders

Happier customers

CAR SALES APP · READY-MADE APP

New & Certified Car Sales App

A customer app where buyers browse, configure and price a car, book a test drive, request a trade-in and apply for finance.

New and certified stock in one place

New and used listings are managed in one place, with availability updated as cars are reserved and sold, so buyers see what is really in stock.

Search, filters and comparison

Buyers find the right car quickly and compare models side by side.

Online showroom

Photos, videos and full specifications for each car, so buyers understand a model before they visit.

Configuration with live pricing

Buyers choose colours, trims and accessories, and the price updates as they build their car.

Android & iOS

Test drive booking

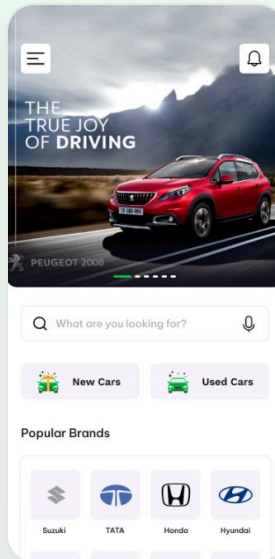

Trade-in requests

Inspection reports

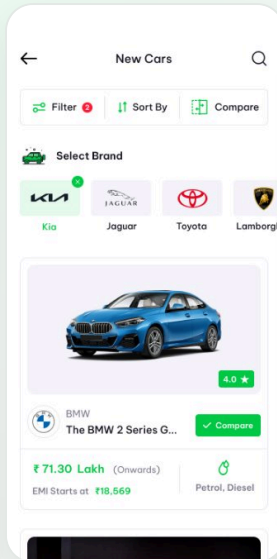

Faster sales

Selling beyond showroom hours

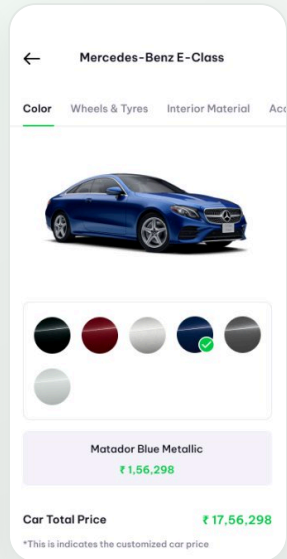

Better-prepared buyers

Home: new, used and popular brands

New cars: filter, sort and compare

A model page: colours and total price

AI built into the work

ALREADY INSIDE THE PRODUCTS

Document reading in the DMS

An assistant in AutoTech360 DMS reads documents into forms, so staff check the details instead of typing them in.

Reply drafts and summaries in the CRM

AutoTech360 CRM drafts WhatsApp replies in the customer's language and adds AI summaries to its reports, so consultants answer faster and...

Receipt reading and a fleet assistant

AutoTech360 Fleet reads fuel receipts and photos into entries for someone to confirm, raises recommendations unasked and answers questions abo...

CUSTOM, ON YOUR OWN DATA

Demand and stock forecasting

Custom models use your sales history, regional demand and seasons to forecast which models and parts will sell, and flag slow-moving stock early.

Lead scoring

Score enquiries by source, vehicle interest and response, so sales teams call the buyers most likely to act first.

Chat assistants

Assistants on your website or WhatsApp answer common questions about stock, prices and bookings, then hand the conversation to a person with the details already captured.

Photo-based inspection

Computer vision flags visible damage in vehicle photos to make check-in and return inspections faster and more consistent. Models are tested on your own photos before go...

Predictive maintenance from telematics

For fleets with telematics data, models trained on fault codes and repair history flag vehicles likely to need attention, on top of the scheduled service reminders in...

Less typing, fewer errors

Documents and receipts read into forms mean staff check details rather than key...

Faster replies to buyers

Reply drafts and lead scores help sales teams answer the right customers first.

Better stock and maintenance decisions

Forecasts and fleet data show what to order, what to service and where the...

AI your team stays in charge of

We design AI features to suggest rather than act, so people decide what is saved...
